Thank you for your participation in Clean Energy Works Portland. The Laborers' Union is excited to be a training partner in this innovative project. In order to assist contractors with their hiring needs the Oregon and Southern Idaho Laborers' Training Trust has developed a weatherization installer training program and conducted classes to train workers in this field. A rigorous screening process has led to our designation as a CEWP training provider.

To access this pool of qualified workers please contact the Laborers' Training Center at 800-511-2907. The training center's Director Al DeVita and his staff will assist you with the hiring process. You will be asked for a contact person/contact information, the expected hire date, and about your hiring process preferences. After hearing from you, we will contact program graduates to inform them of the opening at your company. They will be made available for interviews, submit applications or sent out to the jobsite depending on your preferences.

It is our goal to ensure that both contractors and trainees are satisfied with their experience with the Laborers' Union. Please do not hesitate to follow up with the Training Center if you have questions or comments at any time during or after the hiring process. We will also need to stay in contact with the trainees after job placement to ensure that we are complying with our requirements under the CEWP Community Workforce Agreement as a "designated" training provider. We appreciate your assistance in this follow-up/mentoring process.

Again, thanks for your work in CEWP and please contact the Laborers' Training Center for hiring needs. We look forward to assisting your business.
